Log in to *Mangahigh* and complete the assigned activity.

**Decimal Place Value**

Think of the decimal 12.57. There are 12 whole numbers or ones, there are 57 hundredths, or 5 tenths and 7 hundredths, the number is more than 12 but less than 13...

Now think of the decimal 14.803 and tell me what you can about this number.

Complete the worksheet 'Decimal Place Value' as further revision of decimals.

Use the above picture to help you remember the place value to the right of the decimal point.

**Data**

Collecting data is a way of finding out information about a group of people or about things that they do.

When we collect information (for example by asking a question), we then need to present the information in a clear and easy-to-read way. This can be in the form of a table or a graph.

List down in your workbook as many different graphs as you can.

Complete the 'Interpreting Graphs' worksheet.

**MATHEMATICS**

Complete - Maths Mentals

Log in to *Mangahigh* and complete the assigned activity.

**Calculate Flexibly**

Use the numbers 1, 2, 3, 4, and the operations +, -, ×, ÷ to make equations that equal 24.

Write down 10 different equations you can think of. The equations must equal 24 exactly, consider BODMAS when creating these equations.

**Math Games**

Select some games to play to improve your mathematics skills.

**Line Graphs**

Data can be recorded on a line graph by using a line to join plotted points.

Think of a story to describe the line graph above. The only information you have is that the horizontal axis is labelled "Months". What could the question have been? What could the data be telling us?

Complete the worksheet 'Line Graphs' using the given information.

**MATHEMATICS**

Log in to *Mangahigh* and complete the assigned activity.

**Patterns**

We can use equivalent number sentences that involve multiplication and division to find unknown quantities.

Complete the 'Missing numbers' worksheet to solve equations with missing numbers.

**Mangahigh Games**

Choose a game on mangahigh to complete. If you have finished all of the assigned activities, it should allow you to choose from the Game Centre.

List at least six fruit or vegetables that fit into the different colours listed:

- Red
- Orange/Yellow
- Blue/Purple

- White/Brown

For each colour group, list the health benefits they provide us

**Whole School Task**

Create a fruit and vegetable art display that is completely edible. Take a photo and post it on Seesaw.

(Amazing entries will be posted online.)

**SCIENCE**

**Inquiry Focus: What are stars and constellations?**

Watch the following videos and answer the questions in full sentences.

4. What are all the constellations in the Zodiac and what patterns do they form?

Draw a diagram including the months of the year, the names of the constellations and the patterns they form.

**HSIE – GEOGRAPHY**

**LI:** To recognise the positive and negative impacts humans have on the environment

**SC:** Identify the different environmental changes caused by humans.

**View “Man” video.**

<https://www.youtube.com/watch?v=WfGMYdalCIU>

Students watch the “Man” video. After watching complete the PMI on which students identify the different environmental changes caused by humans. Note that many of these are negative and that the most prevalent one is pollution. Then skip the video to 1:46. Identify the different types of pollution in the video.

Record the extent of noise pollution in different locations of your house. Afterwards, share your findings on the location with the worst and least noise pollution. What are the different ways to counteract noise pollution keeping in mind that the degree of pollution permeating our daily lives is quite significant?  
Upload your findings on Seesaw

**Optional**

If you have an iPad, can you download the noise meter app called Decibel 10<sup>th</sup> (**if your parents allow you to look for the free ones do not buy it**). Investigate the extent of noise pollution in different locations of your house. Afterwards, share your findings on the location with the worst and least noise pollution. What are the different ways to counteract noise pollution keeping in mind that the degree of pollution permeating our daily lives is quite significant?
